EXPLORE MY WORK

Discover my technical skills, software development projects and practical experience through my interactive developer portfolio.

Portfolio: https://naledi-developer-showcase.pages.dev/

SUMMARY

Junior Software Developer with practical experience in designing, building and testing responsive web applications through independent development and portfolio projects. Experienced with React, JavaScript, TypeScript, Python, Flask and foundational Node.js/Express and PostgreSQL development. Built interactive interfaces, reusable components, role-based application flows, forms and validation, and business-focused dashboards. Comfortable using Git and GitHub for version control, troubleshooting application issues and taking projects from an initial idea through implementation and deployment. Seeking a junior software development role where I can contribute to frontend or full-stack projects, strengthen my engineering skills and grow within a development team.

TECHNICAL SKILLS

Programming: JavaScript (ES6+), Python, TypeScript, HTML5, CSS3

Frontend: React, React Router, Vite, reusable components, useState, client-side routing, responsive UI, form validation

Backend & Databases: Flask, Node.js, Express.js, PostgreSQL, SQL fundamentals, pg, dotenv, REST API and CRUD concepts

Development Tools: Git, GitHub, GitHub Desktop, VS Code, debugging, workflow and usability testing

Additional: JSON data handling, pandas, application documentation, troubleshooting and defect resolution

SOFTWARE DEVELOPMENT PROJECTS

Retataise Nursery Creche Management System (In Development)

React, TypeScript, Node.js, Express.js, PostgreSQL

- Built Version 1.0 of the frontend for a preschool management application, with Parent, Teacher and Admin portals and role-specific dashboard flows.
- Implemented React Router navigation, reusable components, controlled forms, state management and client-side validation.
- Developed the initial Node.js/Express backend and connected it to PostgreSQL using the pg package.
- Designed relational database structures for users, children, classes, attendance, announcements, events, timetables and activity logging.
- Continuing development of REST API endpoints, frontend/backend integration, CRUD functionality and backend authentication/authorisation.

ASEIX DATA HOUSE - Business Website & Dashboard Projects

React, JavaScript, CSS, Vite, Python, pandas, JSON, Matplotlib

- Created and deployed the ASEIX DATA HOUSE business website using React, presenting software development, data and technology services and portfolio projects.
- Developed Retail Sales Intelligence using Python and pandas to generate and analyse a 2,000-order synthetic retail dataset across 2025.
- Calculated sales, profit, profit margin, monthly sales and product, customer-segment and provincial performance; exported dashboard-ready metrics and chart data to JSON.
- Built business-focused dashboard interfaces with KPI cards, charts, reporting-period selection and automatically generated insights using synthetic demonstration data.

Rooted Link Recruits - Recruitment Web Application

Python, Flask, HTML, CSS

- Built and tested a multi-page recruitment platform with dynamic routing, form validation, backend processing and responsive user interfaces.
- Tested workflows and usability, resolved defects and documented the project with screenshots on GitHub.

DoneDesk Services - Service Booking & Request Management

HTML, CSS, JavaScript

- Developed a browser-based service booking application with service selection, pricing, booking forms, input validation and confirmation messages.
- Implemented demonstration-only localStorage persistence and an admin dashboard; tested user journeys, form behaviour and business logic.

Pine City Zoo - Website Course Project

HTML, CSS, JavaScript

- Developed and tested a responsive multi-page website during the FNB App Academy learning programme, checking navigation, forms, accessibility and layout consistency.

PROFESSIONAL EXPERIENCE

Hirsch's - Customer Service

- Handled customer enquiries professionally and accurately, resolved customer issues and maintained service quality in a fast-paced environment.
- Developed communication, problem-solving and customer-focused service skills transferable to collaborative software teams.

Impala Crescent Primary School - Educator Assistant / Reading Champion

- Supported learners and collaborated with a colleague in planning learning activities; maintained organised records and documentation.
- Strengthened communication, teamwork, organisation and the ability to explain information clearly.

EDUCATION & CERTIFICATIONS

- Certificate in Full Stack Development - FNB App Academy / IT Varsity (2025)
- National Senior Certificate
- Deloitte Australia Data Analytics Job Simulation - Forage (September 2026)
- Mastercard Cybersecurity Job Simulation - Forage (October 2026)
- AI Specialist for Business Growth - AI Academy (2026)
- TEFL Certification (2026)

CAREER DIRECTION

Seeking junior or entry-level opportunities in Software Development, Frontend Development or Full-Stack Development. Particularly interested in building responsive web applications, developing practical features and APIs, and learning from experienced software engineers.
