NALEDI MOTSHABI

FULL-STACK DEVELOPER | JUNIOR SOFTWARE DEVELOPER

Johannesburg, Gauteng, South Africa | 071 712 2196 | naledi.dev@outlook.com
GitHub: github.com/NalediM-Dev | LinkedIn: linkedin.com/in/naledi-motshabi-a5a245331 | Portfolio: naledi-developer-showcase.pages.dev

PROFESSIONAL SUMMARY

Early-career Full-Stack Developer with hands-on project experience building responsive web applications, interactive user interfaces, business-focused dashboards and application workflows. Able to contribute across the development process, from understanding a problem and structuring an interface to implementing application logic, connecting backend services and working with data. Brings a practical, project-led approach to problem-solving, testing, troubleshooting and continuous learning. Eager to contribute to a collaborative development team, take ownership of meaningful tasks, learn from experienced engineers and steadily grow into a capable full-stack software developer.

DEVELOPMENT CAPABILITIES

- Build responsive, user-focused interfaces and organise application features into reusable components.
- Implement client-side navigation, forms, validation, state handling and interactive application workflows.
- Develop foundational backend functionality, API routes and database connections.
- Work with structured data to generate business insights, metrics and visual reports.
- Use version control, test user journeys, troubleshoot issues and take projects through build and deployment.

SOFTWARE DEVELOPMENT PROJECTS

Retataise Nursery - Creche Management System

Technologies: React, TypeScript, CSS, React Router, Node.js, Express.js, PostgreSQL, pg

- Built the frontend for a preschool management application with Parent, Teacher and Admin portals and role-specific dashboard flows.
- Implemented navigation, reusable interface components, controlled forms, state handling and client-side validation.
- Developed an initial Node.js/Express backend and connected it to PostgreSQL using the pg client.
- Created relational database structures for core records including users, children, classes, attendance, announcements, events, timetables and activity logs.
- Worked with SQL querying and API integration fundamentals; continued development includes expanding endpoints and CRUD workflows.

ASEIX DATA HOUSE - Business Website

Technologies: React, JavaScript, CSS, Vite, Node.js, npm

- Built and deployed a business website presenting data, technology and software solution services.
- Developed a clear business-facing interface to introduce services, showcase projects and provide enquiry/contact pathways.

ASEIX DATA HOUSE - Retail Sales Intelligence

Technologies: Python, Pandas, Matplotlib, CSV

- Generated and analysed a synthetic retail dataset containing 2,000 orders using Python and Pandas.
- Calculated sales, profit, profit margin and product performance metrics to demonstrate business performance analysis.
- Created data visualisations and exported the dataset for reporting and further analysis.

Naledi Motshabi - Developer Portfolio

Technologies: React, TypeScript, CSS, Vite, npm, Git, GitHub, Cloudflare Pages

- Designed and deployed a personal developer portfolio bringing together projects, technical capabilities, professional development and contact information.
- Built responsive sections, interactive project and technology displays, a predefined-response portfolio assistant and a downloadable CV feature.
- Used Git and GitHub for version control and deployed the production build through Cloudflare Pages.

Rooted Link Recruits - Recruitment Web Application
Technologies: Python, Flask, HTML, CSS

- Built and tested a multi-page recruitment platform with application routes, form validation and backend processing.
- Tested workflows and usability, resolved defects and documented project work.

DoneDesk Services - Service Booking & Request Management
Technologies: HTML, CSS, JavaScript, localStorage

- Developed a browser-based service booking application with service selection, pricing, booking forms, input validation and confirmation messages.
- Implemented demonstration-only browser storage and an admin dashboard; tested user journeys, form behaviour and application logic.

Pine City Zoo - Website Course Project
Technologies: HTML, CSS, JavaScript

- Developed and tested a responsive multi-page website during the FNB App Academy learning programme, focusing on navigation, forms and consistent page layouts.

PROFESSIONAL EXPERIENCE

Hirsch's - Customer Service

- Handled customer enquiries professionally, resolved customer issues and supported a positive customer experience in a fast-paced environment.
- Built communication, problem-solving and service skills that transfer to user-focused software development and collaborative teams.

Impala Crescent Primary School - Educator Assistant / Reading Champion

- Supported learners and collaborated with colleagues in learning activities while maintaining organised records and documentation.
- Strengthened teamwork, organisation and the ability to communicate information clearly.

EDUCATION & CERTIFICATIONS

- Certificate in Full Stack Development - FNB App Academy / IT Varsity (2025)
- Deloitte Australia Data Analytics Job Simulation - Forage (September 2026)
- Mastercard Cybersecurity Job Simulation - Forage (October 2026)
- AI Specialist for Business Growth - AI Academy (2026)
- National Senior Certificate (2016)

CAREER OBJECTIVE

Seeking a junior or entry-level opportunity in Software Development, Frontend Development or Full-Stack Development where I can contribute to practical application development, support team goals, strengthen my engineering foundations and grow through hands-on experience, feedback and collaboration.
